PROFESSIONAL SUMMARY

Flutter lead with 5+ years building accessible, production-grade mobile apps with **Riverpod**, **GraphQL**, and design-system-driven UIs across social and health domains. Proven track record in multi-tenant UIKit, Maestro integration testing, and secure authentication. Eager to expand into **Go** backend development.

TECHNICAL SKILLS

Languages: Dart, Go (learning), Python, C++, Java, Swift, JavaScript, TypeScript, SQL
Mobile & Backend: Flutter (Riverpod/Provider), Android SDK, iOS, .NET Core, Node.js, Express.js
APIs & Data: GraphQL, RESTful APIs, Firebase, MongoDB, PostgreSQL, LLM / Gemini API
Testing: Maestro (Integration), Unit & Widget Tests, Test-Driven Development
UI & Design: Multi-tenant UIKit, Design Tokens (spacing, colour, typography), Accessibility (WCAG)
Infrastructure: GitHub Actions (CI/CD), Monorepo, Git, Google Cloud, Docker, Agile/Jira
Security: Cryptography (AES, TLS/SSL), Secure Auth Flows, Encrypted Data Storage

EDUCATION

University of Vienna, Austria — MSc Computer Science	Current
University of Lahore, Pakistan — BSc Software Engineering	2020

PROFESSIONAL EXPERIENCE

Full Stack Mobile Developer (Lead) <i>Raheem Solutions</i>	Jun 2022 – Aug 2023
--	---------------------

- **Architecture:** Led Flutter development with Clean Architecture, **Riverpod**, and **GraphQL** API integration.
- **Design System:** Built multi-tenant UIKit with design tokens (spacing, colour, typography) meeting WCAG accessibility standards.
- **Testing:** Established unit, widget, and **Maestro** integration test suites; collaborated closely with QA engineers.
- **Security:** Designed cryptographically secure auth flows (AES, TLS) for enterprise-grade data integrity.
- **DevOps:** Automated CI/CD with **GitHub Actions** in a **Monorepo**; led code reviews across Agile sprints.

Full Stack Mobile Developer <i>TechnoArts</i>	May 2020 – Jun 2022
---	---------------------

- **Performance:** Used Android Studio Profilers and Flutter DevTools to resolve memory leaks and UI jank.
- **API Integration:** Integrated RESTful and **GraphQL** APIs for real-time, accessible UI updates across platforms.
- **Backend Collaboration:** Partnered with backend teams to design API contracts and synchronise mobile/backend data layers.

AI RESEARCH & PUBLIC SPEAKING

AI-Driven C++ Code Analysis Companion — Master's Thesis	2025 – Present
--	----------------

- Built a C++/Python AI tool (Gemini API) for automated unit test generation, code health scoring, and agentic refactoring.
- Sandboxed Docker execution environment for secure system-level code analysis; invited speaker at **C++ Usergroup Vienna 2025**.

KEY PROJECTS

E-Drive Tracking	Real-time GPS fleet management — 10,000+ active users
Buddy	Field team resource management with offline-first architecture & Riverpod
SalesAssist	Multi-tenant enterprise DMS with clean architecture & design token system
Gemini Dev Assistant	LLM-powered code optimisation & agentic refactoring tool
