Professional Summary

My 4+ years of experience are a bit unique. I'm a lead mobile dev (Flutter, native Android and iOS) who also builds backend (.NET), but my real passion is in AI. My thesis on a C++/Python tool using the Gemini API shows where I want to go next. I'm looking for a role that combines all three.

Technical Skills

- **Languages:** Dart, Python, C++, Java, Swift, JavaScript, TypeScript, SQL.
- **Mobile & Backend:** Flutter (Riverpod/Provider), Android SDK, iOS, .NET Core, Node.js, Express.js.
- **AI & Data:** Gemini API, LLM Integration, MongoDB, PostgreSQL, RESTful APIs.
- **Infrastructure:** Google Cloud, Firebase, Docker, GitHub Actions (CI/CD), Git, Agile/Jira.

Education

Master of Science in Computer Science University of Vienna, Austria	Current
Bachelor of Science in Software Engineering University of Lahore, Pakistan	2020

AI Research & Public Speaking

AI-Driven Code Analysis Companion (Master's Thesis) **2025 – Present**

- Engineered a C++/Python tool utilizing the **Gemini API** for automated unit test generation and code explanation.
- Developed a **sandboxed execution environment** using Docker to secure system-level code analysis and profiling.
- **Key Presentation:** Invited Speaker at **C++ Usergroup Vienna** (2025), presenting on AI-powered code modernization and its implications for modern software development. [Video: YouTube Link]

Professional Experience

Full Stack Mobile Developer (Lead) | Raheem Solutions **Jun 2022 – Aug 2023**

- **Architecture Leadership:** Architected scalable Flutter applications using Clean Architecture and Riverpod state management.
- **Native Integration:** Engineered custom platform channels in **Java** to bridge native Android hardware capabilities with Flutter.
- **Operational Excellence:** Implemented automated **CI/CD pipelines** with GitHub Actions for testing and deployment.
- **Cross-Functional Collaboration:** Led Agile sprints and conducted rigorous code reviews to maintain high quality standards.
- **System Security:** Designed secure authentication flows and encrypted data storage to ensure enterprise-grade integrity.

Full Stack Mobile Developer | TechnoArts **May 2020 – Jun 2022**

- **Performance Optimization:** Utilized Android Studio Profilers and Flutter DevTools to resolve memory leaks and UI jank.
- **Full Stack Development:** Integrated complex RESTful APIs for real-time data fetching and dynamic UI updates.
- **Backend Alignment:** Collaborated with backend teams to design APIs that synchronized seamlessly with mobile frontends.

Large-Scale Impact Projects

- **E-Drive Tracking System:** Led development of a tracking app supporting **10,000+ active users** with real-time GPS integration.
- **Buddy-Team Management:** Engineered a resource tracking and task delegation app with real-time asset monitoring and reporting.
- **Sales Assist Retail:** Streamlined secondary sales processes using data-driven insights and real-time pricing and promotion control.
- **Taza Delivery App:** Optimized milk delivery logistics and route management, significantly improving user retention and satisfaction.
- **Gemini-Enabled Assistant:** Leveraged the Gemini API to build intelligent code optimization, refactoring, and documentation tools.
